EDUCATION

Master of Science in Computer and Information Sciences
University of Delaware, USA — January 2025– December 2026

Bachelor of Technology in Computer Science and Engineering
Gudlavalleru Engineering College — August 2020 – May 2024

TECHNICAL SKILLS

- **Programming & Analytics Languages:** Python, R
- **Data Visualization Tools:** Tableau, Power BI, Qlik, Alteryx Designer, Excel
- **Statistical & Analytical Tools:** SAS
- **Databases & Data Warehousing:** SQL, MySQL, PostgreSQL, MS Access, Oracle, Snowflake
- **Version Control:** Git, GitHub
- **Data Science & Machine Learning:** pandas, NumPy, scikit-learn, XGBoost, Regression, Forecasting, Hypothesis Testing, A/B Testing, Clustering
- **Cloud Platforms & Services:** AWS, S3, RDS
- **Project Management Tools & Methodologies:** JIRA, Confluence, MS Project, Agile, Scrum, Kanban
- ETL Pipelines

INTERNSHIPS

ECCENTRIX
Data Analyst Intern — April 2024 – September 2024

- Designed and deployed scalable Python and SQL based ETL pipelines to process high-volume, real-time industrial sensor data, enhancing early fault detection and reducing unplanned equipment downtime.
- Applied advanced time-series forecasting and pattern recognition models to track asset performance, enabling predictive maintenance schedules that improved operational uptime by 18%.
- Developed interactive Power BI dashboards displaying asset health, MTBF, and failure trends, empowering engineering teams with actionable insights that accelerated maintenance strategies.
- Coordinated with maintenance, engineering, and analytics teams to embed predictive insights into workflows, automating validation and reducing analysis time by 40% while ensuring accurate anomaly alerts.

TheSmartBridge
Data Analytics Intern — November 2023 – April 2024

- Developed interactive Tableau dashboards leveraging advanced Excel and KPI frameworks, enabling stakeholders to derive actionable insights from large datasets and streamline reporting workflows.
- Engineered ETL workflows and automated data cleansing processes, reducing data preparation time by 25% and ensuring analytics-ready datasets for accurate business intelligence reporting.
- Leveraged advanced data storytelling and BI reporting techniques to translate complex data into actionable insights, supporting strategic planning and business growth.
- Collaborated with teams to refine dashboard functionality and improve data accessibility, contributing to a 20% boost in overall user satisfaction.

PERSONAL PROJECTS

Superstore Sales Analysis Dashboard — January 2024 – March 2024

- Analyzed regional and category-level sales trends, uncovering critical bottlenecks impacting profit margins and delivery performance.
- Designed and deployed a multi-layer Tableau dashboard with YoY sales comparisons and detailed category breakdowns, improving data accessibility and driving a 15% increase in stakeholder insights.
- Facilitated prioritization of high-performing segments by integrating sales and logistics metrics into interactive visualizations.
- Enhanced logistics strategy by conducting shipping delay analysis, contributing to a 12% reduction in delivery time through targeted interventions.

CERTIFICATIONS

- Earned Google Data Analytics Professional Certificate.
- Attained AWS Academy Graduate Certification – AWS Academy Data Engineering.
- Achieved Python for Data Science Certification – IBM.
- Certified in Alteryx Designer Core – Alteryx.
